SUMMARY

Final-year Computer Science student, graduating October 2026, with 4 years of experience supporting research operations, digital communications, and web systems at Ontario Tech University. Skilled at building data-driven reporting solutions, maintaining CMS platforms, and bridging technical and administrative teams to improve workflows and ensure data accuracy.

EDUCATION

Ontario Tech University

Bachelor of Science in Computer Science

– Relevant Coursework: Data Mining, Database Systems, Web Development, Algorithms, Data Analysis

Oshawa, ON

Sep 2022 – Oct 2026

PROFESSIONAL EXPERIENCE

Marketing & Administrative Assistant

Office of the Vice-President Research & Innovation, Ontario Tech University

- Built and maintained web-based reporting dashboards using Excel and Power BI, enabling the research office to monitor KPIs and support data-informed decision-making.
- Managed and updated CMS platforms across multiple web properties, ensuring content accuracy, consistent formatting, and compliance with institutional policies.
- Designed and maintained structured datasets to track research engagement metrics, funding activity, and operational performance across departments.
- Served as the primary liaison between administrative, technical, and research teams — coordinating cross-functional updates and streamlining communication workflows.
- Provided front-line technical support and user guidance for internal systems; documented SOPs and workflows to improve team efficiency and support staff onboarding.
- Created digital communications and promotional materials supporting event promotion and stakeholder engagement across the university.

Sep 2022 – Apr 2026

Oshawa, ON

PROJECTS

Research Data Management (RDM) Finder | *HTML, CSS, JavaScript*

- Built a decision-support web tool that recommends institutional data storage solutions based on user inputs, research type, and compliance requirements.
- Implemented multi-layered filtering logic, dynamic data mapping, and real-time UI updates; structured data models to ensure output accuracy and support data governance decisions.

Funding Bulletin | *Content Management System (CMS)*

- Owned end-to-end maintenance of a live CMS portal publishing funding opportunities for researchers; standardized content workflows and metadata tagging to improve consistency and reduce turnaround time.

Aurora - Mental Wellness Application | *React, Firebase*

- Developed a full-stack wellness app with React frontend and Firebase backend, implementing real-time data sync, persistent user state, and structured interaction flows for reliable performance.

LEADERSHIP & ACTIVITIES

Event Co-Host & Social Media Manager

Undergraduate Student Research Awards, Ontario Tech University

- Co-hosted an annual university-wide research awards ceremony for 3 consecutive years, attended by students, faculty, and senior leadership; managed logistics, communications, and stakeholder coordination.
- Produced promotional materials and managed digital campaigns, increasing event visibility and attendance year over year.
